

Job Description: Automation Lead

About Capitols:

Capitolis is a pioneering technology provider for the global capital markets. Founded by key industry executives from banking and financial technology, Capitolis plans to introduce in 2019 new products and services to address capital markets constraints, initially in equities and foreign exchange. It will employ Capitolis' expertise in finance, distribution, and processing to better connect appropriate capital with the best collaborative solutions to clients all over the world.

We are a young startup located in the heart of Tel Aviv, New York City, and London. We are in the business only for the past 2 years, but we are already heavily backed by the leading VCs: Sequoia Capital and Index Ventures.

We are excited to grow the team! We are looking for talented, smart and creative people to join our R&D center in Tel Aviv and help us lead the path and make an impact on the global financial market.

Role description:

We are looking for an experienced hands-on test Automation lead engineer with proven abilities to deliver fast and efficiently. A true team player who is eager to be part of a very unique opportunity in the startup scene.

Qualifications & Experience:

- At least 3 years of experience as Senior Automation Engineer for Enterprise products
- B.S.c. in Computer Science or other relevant fields
- Strong Javascript coding skills – must
- Experience with CI/CD lifecycle integration (i.e. Jenkins)
- Experience with Docker, npm, shell scripting
- Familiar with SQL and/or NoSQL DBs
- Knowledge of common testing frameworks
- Excellent English – spoken and written
- Financial affinity – significant advantage in the Fintech industry
- Load testing experience – an advantage

Location: Midtown Building, Tel- Aviv
