

Job Description: Senior Backend Engineer

About Capitolis

Capitolis is a pioneering technology provider for the global capital markets. Founded by key industry executives from banking and financial technology, Capitolis plans to introduce in 2019 new products and services to address capital markets constraints, initially in equities and foreign exchange. It will employ Capitolis' expertise in finance, distribution, and processing to better connect appropriate capital with the best collaborative solutions to clients all over the world.

We are a young startup located in the heart of Tel Aviv, New York City, and London. We are in the business only for the past 2 years, but we are already heavily backed by the leading VCs: Sequoia Capital and Index Ventures.

We are excited to grow the team! We are looking for talented, smart and creative people to join our R&D center in Tel Aviv and help us lead the path and make an impact on the global financial market.

Role description

We are looking for an experienced hands-on senior backend engineer with proven abilities to deliver fast and efficiently. A true team player who is eager to be part of a very unique opportunity in the startup scene.

Qualifications & Experience

- B.Sc. degree in Computer Science, SW Engineering or equivalent (M.Sc. is an advantage)
- At least 5 years of experience in Java server side development, including cloud services (preferably AWS)
- Experience in building complex large-scale software solutions from scratch to live production
- Strong analytical skills
- Self-starter, fast learner, can-do attitude and great inter-personal skills
- Excellent English communication skills – spoken and written
- Financial affinity - an advantage

Location: Midtown Towers, Tel-Aviv
